PRODUCT DESCRIPTION:

Samyang Reflex f/6.3 300mm ED UMC CS is a small-size reflex lens dedicated for mirrorless compact cameras. The optical structure contains 9 elements arranged in 6 groups, including one ED-type lens ensuring high contrast and effectively preventing chromatic aberration.

Long focal length, exceptionally affordable price and small size (it weighs only 315 g) make this lens a perfect companion for both city and nature photography.

Lens is available in two colours: black and silver.
